Environmental protection policy for the investment period

«Gas Chemical Complex MTO Central Asia» LLC is committed to principles of sustainable development and recognizes the impact of its activities on the environment. Therefore, controlling our environmental impact and preserving the environment is one of our top priorities.

Our commitments

- Comply with the legislation requirements of the Republic of Uzbekistan, international and national standards, local regulations in the field of environmental protection.
- Obtain and keep up-to-date all necessary environmental permits and licenses
- Identify environmental risks and implement best available practices to manage them.
- Ensure rational environmental management, introduce energy and resource-saving, low-waste and environmentally friendly technologies, and strive to achieve carbon neutrality goals.
- Rationally manage water resources, introduce measures to reduce water scarcity, taking into account the dry climate of the region, protect water bodies from pollution.
- Ensure effective waste management by reducing waste generation, introducing waste segregation, reuse and recycling.
- Implement measures aimed at reducing air, soil, surface and underground water pollution and impact on biodiversity.
- Consider impacts on biodiversity during construction.
- Promote corporate culture where all employees will share the Company commitments, as well as through improvement of their skills, knowledge and experience.
- Effectively cooperate with stakeholders on environmental issues and ensure information availability about Company's environmental activities.
- Actively collaborate with state and public organizations, scientific and educational institutions that work effectively in the field of environmental protection and ecological safety.
- Prioritize preventive measures over negative environmental impacts response measures.

Company's obligations listed in this Policy apply to the investment period of the Project. Contractors, suppliers and visitors to the Company's facilities are also required to comply with the environmental requirements stipulated in this Policy.

The management of the Company is responsible for implementation and enforcement of this Policy.
