

SUPPLY CHAIN POLICY LLC "GAS CHEMICAL COMPLEX MTO CENTRAL ASIA"

The aim of the Policy is to define the key principles guiding the creation and management of the Company's supply chain. The Policy sets forth the Company's approach to selecting manufacturers, suppliers, and contractors, establishing basic requirements for the supply chain to ensure well-being, environmental protection, and human rights.

KEY PRINCIPLES

The Company pays close attention to selecting manufacturers and suppliers of equipment, materials, and services for its facilities and expects them to adhere to high standards of business ethics.

Lawful and honest conduct. In order to establish long-term cooperation with the Company, manufacturers and suppliers of equipment, materials, and services are obliged to comply with the legislative requirements of the countries where they operate, in production and transportation of equipment and materials, including measures against corruption, bribery, sanctions, and export-import restrictions. Suppliers should refrain from offering expensive and inappropriate gifts, money, entertainment, and invitations to the Company's employees during both working and non-working hours.

Respect for human rights. The Company expects its manufacturers and suppliers to respect basic human rights - the right to equal opportunities, the right to refuse forced labor, the right to fair wages, and other rights outlined in the UN Declaration of Human Rights.

Occupational health and safety, and environmental protection. The Company establishes long-term relationships only with manufacturers and suppliers who comply with industrial safety regulations, labor health and safety standards, and environmental protection regulations. In case of non-compliance with the provisions of this Policy, the Company reserves the right to initiate termination of contractual relations.

A well-structured supply chain is the key to business sustainability.
