# Health and safety policy for the investment period

---

Our goal – is to achieve health and safety results for employees, contractors, visitors and the public in the operation process of The Gas Chemical Complex MTO Central Asia LLC (the Company) that we can be proud of; build our credibility as a reliable partner for our future customers, partners and society in general.

---

## Our commitments

- Adhere to the principle of zero injuries and minimal impact of the Company activities on the health of employees, contractor personnel, visitors and local residents.
- Take a systematic approach to health and safety management in order to comply with legal requirements as well as voluntary commitments.
- Improvement of the health and safety management system by implementing digital technologies, using global experience and industry's best practices to improve safety and efficiency of processes.
- Prioritize occupational safety and health issues.
- Provide necessary resources to achieve set goals and commitments.
- Involve employees or their representatives in occupational safety and health activities.
- Develop a safety culture in which all employees will share these commitments, including through continuous training, as well as knowledge and experience improvement.

«Each one of us has to intervene and immediately report any actions that endangers one's personal health and safety as well as the health and safety of others».
